

Application for Enrolling Children with Additional Needs (if applicable)

To ensure we are able to appropriately meet the needs of each child enrolled at our centre, we need to consider all children with medical conditions or additional needs on an individual basis.

We ask that all available information be provided prior to your child commencing at our centre. Applications are reviewed each week and a response given as soon as possible. In some cases a child's enrolment may be subject to receiving additional funding, for example SNSS funding, or an assessment by an Occupational Therapist to facilitate their inclusion, before commencing at the Centre.
